Trading Program

The date of this Disclosure Document is March 31, 2025 and may not be utilized after March 30, 2026.

THE COMMODITY FUTURES TRADING COMMISSION HAS NOT PASSED UPON THE MERITS OF PARTICIPATING IN THIS TRADING PROGRAM NOR HAS THE COMMISSION PASSED ON THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

THE DELIVERY OF THIS DISCLOSURE DOCUMENT AT ANY TIME DOES NOT IMPLY THAT THE INFORMATION CONTAINED HEREIN IS CORRECT AS OF ANY TIME SUBSEQUENT TO THE DATE SHOWN ABOVE.

RISK DISCLOSURE STATEMENT

THE RISK OF LOSS IN TRADING COMMODITY INTERESTS CAN BE SUBSTANTIAL. YOU SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION. IN CONSIDERING WHETHER TO TRADE OR TO AUTHORIZE SOMEONE ELSE TO TRADE FOR YOU, YOU SHOULD BE AWARE OF THE FOLLOWING:

IF YOU PURCHASE A COMMODITY OPTION YOU MAY SUSTAIN A TOTAL LOSS OF THE PREMIUM AND OF ALL TRANSACTION COSTS.

IF YOU PURCHASE OR SELL A COMMODITY FUTURES CONTRACT OR SELL A COMMODITY OPTION OR ENGAGE IN OFF-EXCHANGE FOREIGN CURRENCY TRADING YOU MAY SUSTAIN A TOTAL LOSS OF THE INITIAL MARGIN FUNDS OR SECURITY DEPOSIT AND ANY ADDITIONAL FUNDS THAT YOU DEPOSIT WITH YOUR BROKER TO ESTABLISH OR MAINTAIN YOUR POSITION. IF THE MARKET MOVES AGAINST YOUR POSITION, YOU MAY BE CALLED UPON BY YOUR BROKER TO DEPOSIT A SUBSTANTIAL AMOUNT OF ADDITIONAL MARGIN FUNDS, ON SHORT NOTICE, IN ORDER TO MAINTAIN YOUR POSITION. IF YOU DO NOT PROVIDE THE REQUESTED FUNDS WITHIN THE PRESCRIBED TIME, YOUR POSITION MAY BE LIQUIDATED AT A LOSS, AND YOU WILL BE LIABLE FOR ANY RESULTING DEFICIT IN YOUR ACCOUNT.

UNDER CERTAIN MARKET CONDITIONS, YOU MAY FIND IT DIFFICULT OR IMPOSSIBLE TO LIQUIDATE A POSITION. THIS CAN OCCUR, FOR EXAMPLE, WHEN THE MARKET MAKES A "LIMIT MOVE."

THE PLACEMENT OF CONTINGENT ORDERS BY YOU OR YOUR TRADING ADVISOR, SUCH AS A "STOP-LOSS" OR "STOP-LIMIT" ORDER, WILL NOT NECESSARILY LIMIT YOUR LOSSES TO THE INTENDED AMOUNTS, SINCE MARKET CONDITIONS MAY MAKE IT IMPOSSIBLE TO EXECUTE SUCH ORDERS.

A "SPREAD" POSITION MAY NOT BE LESS RISKY THAN A SIMPLE "LONG" OR "SHORT" POSITION.

THE HIGH DEGREE OF LEVERAGE THAT IS OFTEN OBTAINABLE IN COMMODITY INTEREST TRADING CAN WORK AGAINST YOU AS WELL AS FOR YOU. THE USE OF LEVERAGE CAN LEAD TO LARGE LOSSES AS WELL AS GAINS.

IN SOME CASES, MANAGED COMMODITY ACCOUNTS ARE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT AND ADVISORY FEES. IT MAY BE NECESSARY FOR THOSE ACCOUNTS THAT ARE SUBJECT TO THESE CHARGES TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETION OR EXHAUSTION OF THEIR ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS, AT PAGE 18, A COMPLETE DESCRIPTION OF EACH FEE TO BE CHARGED TO YOUR ACCOUNT BY THE COMMODITY TRADING ADVISOR.

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND OTHER SIGNIFICANT ASPECTS OF THE COMMODITY INTEREST MARKETS. YOU SHOULD

THEREFORE CAREFULLY STUDY THIS DISCLOSURE DOCUMENT AND COMMODITY INTEREST TRADING BEFORE YOU TRADE, INCLUDING THE DESCRIPTION OF THE PRINCIPAL RISK FACTORS OF THIS INVESTMENT AT PAGE 9.

YOU SHOULD ALSO BE AWARE THAT THIS COMMODITY TRADING ADVISOR MAY ENGAGE IN TRADING FOREIGN FUTURES OR OPTIONS CONTRACTS. TRANSACTIONS ON MARKETS LOCATED OUTSIDE THE UNITED STATES, INCLUDING MARKETS FORMALLY LINKED TO A UNITED STATES MARKET MAY BE SUBJECT TO REGULATIONS WHICH OFFER DIFFERENT OR DIMINISHED PROTECTION. FURTHER, UNITED STATES REGULATORY AUTHORITIES MAY BE UNABLE TO COMPEL THE ENFORCEMENT OF THE RULES OF REGULATORY AUTHORITIES OR MARKETS IN NON-UNITED STATES JURISDICTIONS WHERE YOUR TRANSACTIONS MAY BE EFFECTED. BEFORE YOU TRADE YOU SHOULD INQUIRE ABOUT ANY RULES RELEVANT TO YOUR PARTICULAR CONTEMPLATED TRANSACTIONS AND ASK THE FIRM WITH WHICH YOU INTEND TO TRADE FOR DETAILS ABOUT THE TYPES OF REDRESS AVAILABLE IN BOTH YOUR LOCAL AND OTHER RELEVANT JURISDICTIONS.

THIS COMMODITY TRADING ADVISOR IS PROHIBITED BY LAW FROM ACCEPTING FUNDS IN THE TRADING ADVISOR'S NAME FROM A CLIENT FOR TRADING COMMODITY INTERESTS. YOU MUST PLACE ALL FUNDS FOR TRADING IN THIS TRADING PROGRAM DIRECTLY WITH A FUTURES COMMISSION MERCHANT OR RETAIL FOREIGN EXCHANGE DEALER, AS APPLICABLE.

APPENDIX A: Y & Q INVESTMENTS, LLC MANAGED ACCOUNT AGREEMENT AND POWER OF ATTORNEY

No person is authorized by Y & Q Investments, LLC to give any information or to make any representations, with respect to the Blue Whale Trading Program ("Trading Program") described below, other than those contained in this Disclosure Document.

ORGANIZATION, NAME AND ADDRESS

Y & Q Investments, LLC ("the Advisor"), a Virginia limited liability company, provides futures trading advisory services to selected clients (herein after referred to as "Clients" and each will be a "Client"). The Advisor maintains its business office at 42764 Jonquil Ln, Chantilly, VA 20152. The books and records of Advisor are maintained at 42764 Jonquil Ln, Chantilly, VA 20152. The Advisor's business telephone number is 703-863-7945. The Advisor's fax number is 703-689-3608.

PRINCIPAL & BUSINESS BACKGROUND

The Advisor is a Virginia limited liability company that was formed on July 14, 2010. The effective date of this Disclosure Document is March 31, 2025. The Disclosure Document is presented to potential Clients to inform each such potential Client about the Advisor and the Advisor's Trading Program.

The Advisor became registered with the Commodity Futures Trading Commission ("CFTC") as a commodity trading advisor ("CTA") and a commodity pool operator ("CPO") on July 30, 2010, and became a Member of the National Futures Association ("NFA") on July 30, 2010.

The Principals of the Advisor are Dan Yu, Feng Qian and James Lu. The Advisor's trading results are disclosed in page 22.

Dan Yu
Managing Director

Mr. Yu is a managing director of Y & Q Investments, LLC and is directly responsible for all trading and money management decisions within the trading programs.

From February 1999 to July 2005, Mr. Yu worked in the information technology industry. He worked as a programmer from February 1999 to October 2000 at AutoQuotes, Inc., a company that provides quotes software. As a programmer in the IT department, he was responsible for developing the quotes software. From October 2000 to October 2001 he worked as a software analyst at Manasys Inc., a company that provides IT services. His primary duty involved developing software for other companies. From November 2001 to September 2004, Mr. Yu worked as a software developer at Databuilt, Inc., a company that develops web-based services for the architecture, construction and engineering (ACE) industry. From September 2004 to July 2005 he worked as a senior consultant at CSC Consulting, Inc., a consulting company, where he provided IT services to America Online.

From August 2005 through June 2006, Mr. Yu was not employed but worked on developing his own business venture. In June 2006, Mr. Yu founded Dynamic Trade Systems, Inc., a company that provides investment software to customers. As Chief Executive Officer, he was responsible for company management and software development until June 2007. In June 2007, he founded Pancoo Inc., a company that provides investment software and investment education to customers. He continues to serve as the Chief Executive Officer responsible for company management and software development. In March 2009, Mr. Yu and Mr. Qian formed Ox Investment Group, a Virginia corporation, to invest their money in the futures markets, primarily selling options on Emini-Nasdaq index futures. As the Chief

Executive Officer, he is responsible for all trading of the company's account, which is 100% owned by Mr. Yu and Mr. Qian. In July 2010, he founded Y & Q Investments LLC.

Mr. Yu graduated in December of 1998 from the University of Florida with a Master's Degree of Computer Information Science of Engineering.

Mr. Yu was listed as a Principal of the Advisor on July 30, 2010 and became registered with the CFTC as an Associated Person of the Advisor on July 30, 2010. He became an Associate Member of the NFA on July 30, 2010.

Feng Qian
Managing Director

Mr. Qian is a Managing Director of Y & Q Investments LLC and is directly responsible for marketing and business development, finance administration, and software development.

From January 2000 to December 2000, Mr. Qian worked as a consultant at Freddie Mac, a mortgage lending company. His duties included developing web-based multi-family loan pricing systems. From January 2001 to August 2001, he worked as a senior developer at the American Association of Retired Persons (AARP), a non-profit membership organization for people age 50 and over. His duties included developing the AARP Volunteer Management Information System. From August 2001 to the present, Mr. Qian works as a Senior Web Developer at Northrop Grumman, an aerospace and defense technology company. His primarily duties include developing the Defense Occupational and Environmental Health Readiness System. In March 2009, Mr. Qian and Mr. Yu formed Ox Investment Group, a Virginia corporation, to invest their money in the futures markets, primarily selling options on Emini-Nasdaq index futures. He serves as the company's President. In July 2010, he became involved with Y & Q Investments, Inc. as a Managing Director.

Mr. Qian received both his Bachelor of Science and a Master of Science in Mechanics and Automation from Tsinghua University in Beijing, China in July 1987. He then received a Master of Science degree and Ph.D. in Computer Science and Numerical Simulation at Drexel University in August 1995.

Mr. Qian was listed as a Principal of the Advisor on September 23, 2010 and became registered with the CFTC as an Associated Person of the Advisor on September 23, 2010. He became an Associate Member of the NFA on September 8, 2010.

James Lu
Managing Director

Mr. Lu is a managing director of Y & Q Investments, LLC and is responsible for providing business advice and fund marketing. He is listed as a Branch Office Manager of Y & Q Investments, LLC as of Jan. 22 2015.

From February 2008 to current, James Lu has invested as a private investor in stocks, bond, futures and options; provided business consulting to Chinese individuals. From July 2011 to current, Mr. Lu is the CEO of Blue River Research, LLC, a company that provides generic business consulting.

From April 2004 to January 2008, James Lu was the Managing Director and Head of quantitative trading at Tribeca Global Investment, LLC, New York. Tribeca Global Investments, LLC is a multi-strategy hedge fund owned by Citigroup. Citigroup is a diversified financial service company. At Tribeca Global, he managed and supervised US and international stock portfolios, commodities, global fixed income and foreign currencies; had built the whole department from scratch; hired and trained all the senior portfolio managers and analysts; set up the real time trading system for high frequency trading; provided guidance to the company-wide investments.

From July 2003 to March 2004, James was a portfolio manager at Paloma Partners, Greenwich, CT. Paloma Partner is a multi-strategy hedge fund. Mr Lu managed US and UK stock portfolios. He traded statistical-arbitrage portfolios of US and UK stocks; led junior people research on new models and ideas; these models are based on both technical and fundamental factors; the factors include price and earning momentums, mean-reversion, and various fundamental factors.

From August 2000 to June 2003, James was a portfolio manager at Millennium Partners, New York. Millennium Partners is a multi-strategy hedge fund. At Millennium, he managed US stock portfolios and traded statistical-arbitrage portfolios of US stocks; researched on new models and ideas; these models are based on both technical and fundamental factors; the factors include price and earning momentums, mean-reversion, and various fundamental factors.

From August 1998 to July 2000, James Lu was a proprietary trader of US equity trading at Credit Suiss First Boston, New York. Credit Suisse First Boston is a diversified financial service company. At CSFB, he traded US stock portfolio and traded statistical-arbitrage portfolios for US stocks; these models are based on technical factors; provided researches directly to the global equity head.

In September 1992 James Lu got his Ph.D. in Mechanical Engineering from the University of Strasbourg (Louis Pasteur), France.

In May 1998, James Lu received his MBA (concentration in finance) from the School of Management, Yale University.

In March 1987, James Lu got his master degree from Shanghai Jiaotong University and in July 1984 he got BS from Qinghua University, Beijing China.

Mr. Lu was listed as a Principal of the Advisor on Aug. 14, 2013 and became registered with the CFTC as an Associated Person of the Advisor on Aug. 9, 2013. He became an Associate Member of the NFA on Aug. 02, 2013.

FUTURES COMMISSIONS MERCHANT & INTRODUCING BROKER

Futures Commission Merchant

Clients shall maintain their accounts to be managed by the Advisor (the "Managed Account") with any futures commission merchant ("FCM") of the Client's choice provided that the FCM is: (i) registered with the CFTC as an FCM and (ii) a member of the NFA. The Advisor is not permitted to hold Client funds, securities, commodities, or other property. If Client does not designate an FCM of their choice, the FCM shall be Stonex Financial, Inc.(StoneX). A Client's account will be opened in the name of the Client with the FCM and the Advisor will be granted a Limited Power of Attorney to execute trades on behalf of the Client. The Advisor is not permitted to hold Client funds, securities, commodities, or other property. The FCM selected by the Client will be responsible for executing trading orders given by Advisor on behalf of the client, providing a daily written record of any futures or options activity in the account and a summary recapping the month's performance (including open positions held in the account and their value at month end). The FCM will charge a commission and any other required fees for these transactions according to its separate schedule of charges.

Below is a list of material, administrative, civil, enforcement, or criminal complaints or actions filed against StoneX Financial Inc. - FCM Division (f/k/a INTL FCStone Financial Inc. - FCM Division) that are outstanding, and any enforcement actions or complaints filed against the StoneX Financial Inc. - FCM Division in the past five years which meet the materiality thresholds in CFTC regulations 4.24.(l) and 4.34(k), as of the date of this document.

After a historic move in the natural gas market in November of 2018, INTL FCStone Financial Inc. – FCM Division ("IFF") experienced a number of customer deficits. IFF soon thereafter initiated NFA arbitrations, seeking to collect these debits, and has also been countersued and sued in a number of these arbitrations. These accounts were managed by Optionsellers.com, ("Optionsellers") who is a Commodity Trading Advisor ("CTA") authorized by investors to act as attorney-in-fact with exclusive trading authority over these investors' trading accounts. These accounts cleared through IFF. After this significant and historic natural gas market movement, the accounts declined below required maintenance margin levels. IFF's role in managing the accounts was limited. As a clearing firm, IFF did not provide any investment advice, trading advice, or recommendations to customers of Optionsellers who chose to clear with IFF. Instead, it simply executed and cleared trades placed by Optionsellers on behalf of Optionsellers' customers. Optionsellers is a CFTC registered CTA operating under a CFTC Rule 4.7 exemption from registration. Optionsellers engaged in a strategy that primarily involved selling options on futures products. The arbitrations between IFF, Optionsellers, and the Optionsellers customers are currently ongoing.

The FCM Division of StoneX Financial, Inc. ("SFI") is subject to litigation and regulatory enforcement in the normal course of business. Except as discussed above, the current or pending civil litigation, administrative proceedings, or enforcement actions in which the firm is involved are not expected to have a material effect upon its condition, financial or otherwise. The firm vigorously defends, as a matter of policy, civil litigation, reparation, arbitration proceedings, and enforcement actions brought against it.

Introducing Broker

The Advisor utilizes Hughes & Company LLC (H&C) as the introducing broker to StoneX for the execution account for its trading program, and for its Clients accounts at StoneX if an introducing broker and/or FCM is not designated. Clients are not required to utilize an introducing broker with regard to their account in the trading program and are free to choose an introducing broker subject to the approval of the Advisor. In the event that an introducing broker is used in the future, such firm will be (i) registered with the CFTC as an introducing broker and (ii) a member of the NFA. The Advisor expects that it will approve as an introducing broker any firm which meets the above requirements.

There are no material civil, administrative, or criminal proceedings pending, on appeal or concluded against Hughes & Company LLC or its principals in the past 5 years.

THE TRADING PROGRAM – PRINCIPAL RISK FACTORS

Investments in futures contracts and options on futures contracts (together, as the context requires, "futures") are highly speculative, and involve a high degree of risk as compared to other types of investments. Some of the risk factors that should be considered are the following:

Risks of Investments – All investments risk the loss of capital. No guarantee or representation is made that the Advisor's program will be successful. Certain investment techniques of the Advisor can, in certain circumstances, substantially increase the impact of adverse market movements to which Client accounts may be subject. In addition, investment in commodity futures may be materially affected by conditions in the financial markets and overall economic conditions occurring globally and in particular countries or markets where the Advisors invests. The Advisor's methods of minimizing such risks may not accurately predict future risk exposures. Also, information used to manage risks may not be accurate, complete or current, and such information may be misinterpreted.

Changes in Investment Strategies – The Advisor has broad discretion to expand, revise or contract the trading program without the prior approval by or consent of the Client. The Partnership's investment strategies may be altered. The notice shall be given to all existing client s in the trading program within 21 calendar days of the trading advisor first knowing the Disclosure Document to be materially inaccurate or incomplete in any respect.

Undisclosed Investing Strategy – The Advisor's investment strategy and the techniques it will employ are proprietary and will not be disclosed to Clients. As a result, a potential client's decision to have the Advisor manage an account must be made without the benefit of being able to review and analyze the Advisor's strategy and techniques.

Effect of Performance Allocation – The Advisor will receive a performance allocation based on a percentage of any net realized and unrealized profits. Performance allocations may create an incentive for the Advisor to make investments that are riskier or more speculative than would be the case in the absence of such incentive compensation arrangements. In addition, the Advisor's performance allocations will be based on unrealized as well as realized gains. There can be no assurance that such unrealized gains will, in fact, ever be recognized. Furthermore, the valuation of unrealized gain and loss may be subject to material subsequent revision.

Commodity Futures Contracts – Trading in commodity interests may involve substantial risks. The low margin or premiums normally required in such trading may provide a large amount of leverage, and a relatively small change in the price of a security or contract can produce a disproportionately larger profit or loss. There is no assurance that a liquid secondary market will exist for commodity futures contracts or options purchased or sold, and the Client account may be required to maintain a position until exercise or expiration, which could result in losses. Futures positions may be illiquid because, for example, most U.S. commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as "daily price fluctuation limits" or "daily limits." Once the price of a contract for a particular future has increased or decreased by an amount equal to the daily limit, positions in the future can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit. Futures contract prices on various commodities or financial instruments occasionally have moved to the daily limit for several consecutive days with little or no trading. Similar occurrences could prevent the Advisor from promptly liquidating unfavorable positions and subject the Client's account to substantial losses. In addition, the Advisor may not be able to execute futures contract trades at favorable prices if trading volume in such contracts is low. It is also possible that an exchange or the Commodity Futures Trading Commission (the "CFTC") may suspend trading in a particular contract, order immediate liquidation and settlement of a particular contract or order that trading in a particular contract be conducted for liquidation only.

The Advisor may trade on certain non-U.S. commodity exchanges which, in certain countries, are essentially "principals' markets" in which performance of the commodity future contract is the sole responsibility of the individual member with whom the trader has entered into a commodity contract and not of an exchange or clearinghouse. In such cases, the Client account is exposed to the risk of the inability of, or refusal by, the counterparty to settle the transaction or perform its obligations under such contract. In addition, certain non-U.S. commodity exchanges may impose price fluctuation limits when trading and/or speculative position limits on the number of positions that may be held in particular commodities. As a general matter, trading in commodity futures contracts and options in either U.S. or non-U.S. commodity exchanges are highly specialized activities that may entail greater risks than ordinary investment or trading.

<u>Futures Trading is Volatile and Speculative</u> – Futures markets are highly volatile. Futures contracts are influenced by, among other things, changing supply and demand relationships, governmental actions, agricultural and commercial trade programs and policies, national and international political events, national and international economic events, weather and other natural occurring phenomena, and prevailing psychological characteristics of the marketplace. Market volatility could potentially result in rapid and drastic changes in market prices and substantial losses. Volatility in the markets in which the Advisor holds positions could also impair its ability to achieve its objective.

<u>Futures Trading May Be Highly Leveraged</u> – The margin deposit required to enter into a futures position is typically 2-10% of the total value of the futures contract. As a result, if the Client's account is margined, a relatively small price movement in a commodity futures contract may result in a loss to the investor equal to or substantially greater than the amount of the deposit. Combined with the volatility of futures prices, the leveraged nature of futures trading can cause futures traders to sustain large and sudden losses of their capital. When the market value of a particular open position changes to a point where the margin on deposit in a participating Client's account does not satisfy the applicable maintenance margin requirements imposed by the Client's FCM, the Client, and not the Advisor, may receive a margin call from the FCM. If the Client does not satisfy the margin call within a reasonable time (which may be as brief as a few hours), the FCM may close out the Client's position, and depending on the margin call's severity, may close the Client's account as well.

<u>Futures Markets May Be Illiquid</u> – Most United States futures and commodities exchanges place limits on commodities and futures contract price fluctuations during a single trading day. These regulations are referred to as "daily price fluctuation limits" or "daily limits." During a single trading day, no trades may be executed at prices beyond the daily limit established, in advance, by the futures or commodities exchanges. Once the price of a futures contract has increased or decreased by an amount equal to, or greater than, the daily limit, positions in the commodities or futures contract cannot be initiated or sold unless traders are willing to affect trades at or within the daily price limit. In the past, futures and commodities prices have moved the daily limit for several consecutive days with little or no trading. Similar occurrences in the future could prevent the Advisor from promptly liquidating Clients' unfavorable positions and could subject Clients to substantial losses.

Risks of Trading Options – The primary strategy of the trading programs is to write (sell or "go short") options on commodity futures. However, from time to time the Advisor may buy ("go long") options on futures contracts. Buying and selling either call or put options entail significant risks. Although an option buyer's risk is limited to the amount of the option's purchase price, an option may be subject to greater fluctuation than an investment in the underlying investment. The use of leverage available in trading options may yield greater profits or greater losses than trading in the underlying securities would.

Selling uncovered ("naked") options (i.e., where the seller does not own the underlying investment) is significantly more risky than buying the underlying investment. The potential loss from writing an uncovered call is unlimited since the value of the underlying investment may increase infinitely. The potential loss that may result from writing an uncovered put is limited to the extent that the value of the underlying investment cannot fall below zero; however, the losses may still be substantial or total.

Trading of Options on Futures Presents the Risk of Lost Premiums – Advisor may engage in the trading of options on futures. If Advisor buys an option (either to sell or buy a futures contract or commodity), the Client will be required to pay a "premium" representing the market value of the option. Unless the price of the futures contract or commodity underlying the option changes and it becomes profitable to exercise or offset the option before it expires, the Client may lose the entire amount of the premium plus any transaction fees. Conversely, if Advisor, on behalf of Client, sells an option (either to sell or buy a futures contract or commodity), the Client will be credited with the premium minus any transaction fees but will have to deposit margin with the Client's FCM due to the Client's contingent liability to deliver or accept the futures contract or commodity underlying the option in the event the option is exercised. The selling or writing of options can lead to unlimited losses. The ability to trade in or exercise options may be restricted in the event that trading in the underlying futures contract or commodity becomes restricted.

Risks Associated with Spread Trading – A "spread" position may not be less risky than a simple "long" or "short" position. In addition, commission charges for spread positions are higher because such trades by definition have at least two legs, each of which incurs a commission fee. Spread trades are often extended in duration by moving one leg of the spread, which causes additional commissions to be incurred. Under certain market conditions, a spread trade (like any futures trade) can pose unlimited risks.

Possible Effects of Speculative Positions and Trading Limits – The CFTC and certain futures and commodities exchanges have established limits referred to as "speculative position limits" which refer to the maximum net long or short position which any person may hold or control in a particular commodity or futures contract at any given time. Under certain circumstances, Client accounts controlled by the Advisor may be aggregated for the purpose of determining position limits. The Advisor does not anticipate that current position limits will adversely affect the contemplated trading of the accounts it manages, but no assurance is given that such limits may not adversely affect such accounts in the future.

Possible Effects of Other Quantitative Identification Models – If many traders follow models very similar to those of the Advisor, similar buy and sell orders may be placed at or about the same time, making it more difficult to establish or liquidate a position at a given price. While the effect of any increase in the proportion of funds traded pursuant to quantitative models in recent years cannot be determined, any such increase could alter market patterns or affect execution of trades to the detriment of your account's performance.

Default of Futures Commission Merchant – A Client could be unable to recover assets held at the FCM in the event of an FCM bankruptcy. Although Futures Commission Merchants are required to segregate customer accounts pursuant to the Commodity Exchange Act, in the event of the FCM's bankruptcy, there is no available equivalent of Securities Investors Protection Corporation insurance, which is applicable in the case of securities broker dealer bankruptcies. In such an event, a Client may suffer a total loss of all funds on deposit with a defaulting FCM even if such funds are properly segregated by the FCM.

Risk of Default of Exchanges – Exchange-traded futures contracts are utilized by the Advisor, and although these exchanges are highly regulated and have never experienced a default in the past, there is a risk that these exchanges could fail to perform in clearing executed transactions.

Trading on Foreign Commodity Exchanges – The Advisor may trade for a participating customer's account on exchanges located outside the United States. Some foreign exchanges, in contrast to domestic exchanges, are "principals' markets" in which performance with respect to a contract is the responsibility only of the individual member with whom the trader has entered into the contract and not of the exchange or its clearinghouse, if any. In the case of trading by the Advisor on foreign exchanges, a participating customer will be subject to the risk of the inability of or refusal by the counterparty to perform with respect to contracts. A participating customer also may not have the same access to certain trades as do various other participants in foreign markets.

Moreover, as a participating customer's account is denominated in United States dollars, with respect to trading on foreign markets a participating customer will be subject to the risk of fluctuation in the exchange rate between the local currency and dollars and to the possibility of exchange controls. Unless the Advisor hedges a participating customer's account against fluctuations in exchange rates between the United States dollar and currencies in which trading is done on foreign exchanges, any profits participating customer might realize in such trading could be eliminated as a result of adverse changes in exchange rates and a participating customer could even incur losses as a result of any such changes.

Trading on foreign exchanges is not regulated by the CFTC or any other United States governmental agency and may involve certain risks not applicable to trading on United States exchanges, such as risks of fluctuations in the exchange rate between the currency of the locale of the foreign exchange and United States dollars, exchange controls, expropriation, burdensome or confiscatory taxation, moratoriums, or political or diplomatic events.

Electronic Trading and Order Routing Systems – The Advisor intends to trade on electronic trading and order routing systems, which differ from traditional open outcry pit trading and manual order routing methods. Transactions using an electronic system are subject to the rules and regulations of the exchanges offering the system or listing the contract. Characteristics of electronic trading and order routing systems vary widely among the different electronic systems with respect to order matching procedures, opening and closing procedures and prices, error trade policies and trading limitations or requirements. There are also differences regarding qualifications for access and grounds for termination and limitations on the types of orders that may be entered into the system. Each of these matters may present different risk factors with respect to trading on or using a particular system. Each system may also present risks related to system access, varying response times and security. In the case of internet-based systems, there may be additional risks related to service providers and the receipt and monitoring of electronic mail.

Trading through an electronic trading or order routing system is also subject to risks associated with system or component disruption or failure. In the event of system or component disruption or failure, it is possible that for a certain time period, it might not be possible to enter new orders, execute existing orders or modify or cancel orders that were previously entered. System or component disruption or failure may also result in loss of orders or order priority. Some contracts offered on an electronic trading system may be traded electronically and through an open outcry pit during the same trading hours. Exchanges offering an electronic trading or order routing system and listing the contract may have adopted rules to limit their liability, the liability of futures brokers and software and communication system vendors and the amount that may be collected as a result of system failures and delays. These limitations of liability provisions vary among the exchanges. The Advisor plans to use such electronic trading systems and thus the Client will be exposed to risks associated with the systems disruption or failure as noted above.

Uncertainty of Regulatory Changes – Regulatory changes could have a material and adverse effect on the Client's account. The United States futures and commodities markets are subject to on-going and substantial regulatory changes, and it is impossible to predict what statutory, administrative or exchange imposed restrictions may become applicable in the future.

"Stop Loss" May Not Be Effective – The placement of contingent orders by the Advisor, such as "stop-loss" or "stop-limit" orders, will not necessarily limit the Client's losses to the intended amounts, since market conditions may make it impossible to execute such orders.

Advisor Methodology – Trading decisions of the Advisor are made on a discretionary basis using proprietary analysis, and no assurance can be given that such trading strategies used by Advisor will be successful, or that losses could not occur. The Advisor has established a set of parameters or guidelines for the Advisor's trader(s) to follow when initiating a new or closing an existing position. The Advisor's intention in establishing such guidelines is to prevent, to the extent possible, the Advisor's trader(s) from initiating or closing positions based on personal market interpretation or bias, or trading on emotion.

Futures trading typically involve a much higher frequency of trading and higher turn-over of positions than would be found in other types of investments. Trade duration can range from a few seconds to a few months with intra-day trades being a common occurrence. In entering orders into Client accounts, the Advisor will use market, limit, stop, and other qualified orders, if in the Advisor's judgment, these appear appropriate under given market conditions. In addition, when liquidating a position, the Advisor may place a reversal order, i.e., the current position is liquidated and an opposite one is established.

"Batched Orders" (or "Bunched Orders") – If the Advisor places "batched orders" (sometimes also referred to as "bunched orders") with regard to trades entered into on behalf of Clients, batched orders will be allocated to Client accounts in a systematic non-preferential manner. A batched order is a group of orders for more than one Client entered as one order.

If the batched order does not fill at one price, resulting in partial fills, allocations to Client accounts are expected to be made pursuant to a non-preferential method facilitated through the FCM's back office and the allocation scheme provided by the Advisor.

Some of the methods that may be utilized to place batched orders in a non-preferential manner are the following:

a. Rotation of Accounts

This allocation procedure involves a rotation of accounts on a regular cycle, usually daily or weekly, which receive the most favorable fills. For example, if a firm has 100 accounts trading a particular trading program, in the first phase of the cycle, Account #1 receives the best fill, Account #2 the second best, etc. In phase 2 of the cycle, Account #2 receives the best fill and Account #1 moves to the end of the line and receives the least favorable fill.

b. Random Allocation
This allocation method involves preparing on a daily basis a computer generated random order of accounts and allocate the best price to the first account on the list and the worst to the last.

c. Highest Prices to the Highest Account Numbers
This allocation method involves ranking accounts in order of their account numbers and then allocate the highest fill prices to the accounts with the highest account numbers. Any advantage the higher numbered accounts enjoy on the sell order are theoretically offset by the disadvantage on the buy orders. Although, under certain market conditions this may not always be true.

d. Average Price
With regard to split fills, firms may have internal programs which calculate the average price for each bunched order. The program will then assign the average price to each allocated contract. In the alternative, the program will allocate the actual fill prices among the accounts included in the order to approximate, as closely as possible, the average fill price. Either average price allocation method offers a consistent non-preferential method for allocating trades.

Day Trading – Day trading can lead to large and immediate financial losses. Day trading involves aggressive trading, and generally a commission will be due on each trade. The total daily commissions paid on trades will add to losses or significantly reduce earnings. Day trading on margin or using excessive leverage when establishing positions, either short or long may result in Client losses beyond their initial investment. Day trading also requires in-depth knowledge of the markets and trading techniques and strategies. Under certain market conditions, it may be difficult or impossible to liquidate a position quickly and at a reasonable price. This can occur, for example, when the S&P 500 E-mini market suddenly drops, or if trading is halted due to recent news events or unusual trading activity. The more volatile a trading instrument, the greater likelihood problems may be encountered in executing a transaction. In addition to normal market risks, there may be losses due to systems failures.

Account Concentrations – The Advisor's Trading Program may include concentrated positions in futures contracts and options on such contracts. Consequently, Client accounts may not contain a variety of diverse positions. Concentration of trading in one type or even a small number of futures contracts may subject the account to relatively greater volatility.

Trading Errors – Though the Advisor will attempt to correct trading errors as soon as they are discovered, the Advisor will not be responsible for poor executions or trading errors committed by the FCM or the Advisor. All errors, except those resulting from willful misconduct or fraud, will be considered a cost of doing business.

The Advisor may be involved with Employment and/or other Business/Personal Activities – The Advisor's external activities could limit the Advisor's ability to monitor the markets on an intra- day basis. Additionally, the principals and/or employees of the Advisor may have external activities which could limit any such person's ability to monitor the markets on an intra-day basis.

Increasing the Assets Under Management by Advisor May Degrade Results – There appears to be a tendency for the rates of return achieved by advisors to degrade as assets under management increase. The Advisor has not agreed to limit the amount of additional assets which it may manage, and is actively engaged in seeking new accounts.

Risk of Loss – Clients are personally liable for losses in their trading accounts. POTENTIAL LOSS IS BY NO MEANS LIMITED TO THE AMOUNT OF ASSETS WHICH YOU DEPOSIT IN YOUR ACCOUNT. FOR EXAMPLE, IN A MARKET IN WHICH THE ADVISOR IS UNABLE TO LIQUIDATE POSITIONS, YOU COULD LOSE WELL IN EXCESS OF THE MAXIMUM AMOUNT THAT YOU COMMITTED TO YOUR ACCOUNT.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THE ADVISOR'S TRADING PROGRAM. POTENTIAL CLIENTS SHOULD READ THE ENTIRE DISCLOSURE DOCUMENT AND FAMILIARIZE THEMSELVES WITH FUTURES TRADING, BEFORE DECIDING TO INVEST IN THIS PROGRAM.

TRADING PROGRAM AND STRATEGY

The exact nature of the Advisor's trading strategy is proprietary and confidential. The following description is of general necessity and is not intended to be exhaustive.

Overview of the Blue Whale Trading Program

The Advisor's Trading Program is designed to achieve capital preservation and to generate consistent returns. The Advisor will attempt to achieve this objective by utilizing the Advisor's proprietary trading strategies which seek to identify and capitalize on trends within the futures and commodities markets. There can, of course, be no assurance that such objective will be achieved or that substantial losses will not be incurred.

Instrument Traded

While the Advisor will be permitted to trade a variety of futures products, the Advisor will primarily focus on S&P E-mini futures, E-mini Nasdaq futures, and standard S&P 500 futures. The Advisor has the discretion to also trade foreign futures or options contracts on foreign exchanges.

Futures Positions

The S&P 500 E-Mini is an electronically traded futures contract on the Chicago Mercantile Exchange that is one-fifth the size of the standard S&P 500 futures contract. While normal S&P futures contracts have a point value of $250, the E-Mini contract has a point value of $50 and thus can be purchased in smaller amounts. The E-Mini Nasdaq 100 contracts are smaller electronically traded versions of the Nasdaq 100 stock index. While normal Nasdaq futures contracts have a point value of $100, the E-Mini Nasdaq has a point value of $20. Trading the E-Mini Nasdaq 100 gives numerous opportunities in the market, especially in the technology sector. The Advisor believes that advantages of trading S&P 500 E-Mini and Nasdaq E-Mini contracts may include liquidity, greater affordability for individual investors and around-the-clock trading.

Options on Futures

The Advisor will write options on futures contracts that are "out of the money", the duration of the option positions is 3-day, weekly, or monthly mixed, which the Advisor believes will expire worthless if held until maturity. Such strategy will be used to generate income in the Account. (The Advisor may elect to close out short positions by buying them back prior to expiration.) Options that are further out of the money are less risky and consequently yield a lower premium than options that are closer to or "at the money."

The Advisor may also write options with strike prices that are closer to being "in the money." Options that are closer to being in the money will yield a higher premium, thereby generating more income in a Client's Account. However, such options will also incur a higher degree of risk that they will be exercised by the option holder at a loss to the Client if the financial markets move against the position.

The Advisor may also purchase call and/or put options with strike prices that are "in the money" or "out of the money" as part of the overall strategy to generate income in a Client's account and/or to mitigate risk.

The Strategy

The main focus of the trading program is on selling (writing) call / put options of the stock index futures with a strike price outside the predicted range and which the Advisor believes will expire worthless. The Advisor will keep the collected option premiums as profits. The Advisor differentiates itself from others by selecting optimal strike prices and more importantly, selecting the dynamic adjustments of positions when needed. The selections and adjustments are based on a forecast of the market in the subsequent months. The forecast is done using a proprietary technical and fundamental analysis of S&P 500 or Nasdaq index. Sometimes, the Advisor may buy options to control risks or achieve greater returns. In summary, the strategy predominantly employs short strangles, but the Advisor may also trade spreads.

Risk Management

The Advisor has designed tight and sophisticated risk management procedures through the trading of its Principals' proprietary trading accounts. It has lowered the risk in those proprietary trading accounts by dynamically adjusting positions that the market is against at earlier times. While the Advisor intends to use these risk management procedures developed in its Principal's proprietary accounts in the Trading Program, there is no guarantee such procedures will similarly lower risk in the Trading Program. The Advisor may use various strategies to mitigate the risk of loss inherent in writing options. These potential strategies include purchasing options to establish credit or debit spreads which would limit the maximum potential loss if the short option position goes "in the money." Alternatively, the Advisor may seek to reduce the risk of loss from selling options by buying back the short option positions if and when they become too risky. While these strategies might prevent a total loss to a Client's account, they may be costly to implement and could result in a significant reduction of Client's assets.

Order Allocation

From time to time, the Advisor may aggregate orders for multiple accounts traded pursuant to the Trading Program and allocate executed trades following execution. To determine post-execution allocations, the Advisor currently relies upon non-preferential methods designed to comply with applicable NFA rules.

Other Aspects of Trading Program

THE ADVISOR IS NOT LIMITED BY THE ABOVE DISCUSSION OF THE TRADING PROGRAM. FURTHER, THE TRADING PROGRAM IS A STRATEGY AS OF THE DATE OF THIS DOCUMENT ONLY. THE ADVISOR HAS WIDE LATITUDE TO INVEST OR TRADE THE MANAGED ACCOUNT, TO PURSUE ANY PARTICULAR STRATEGY OR TACTIC, OR TO CHANGE THE EMPHASIS, PROVIDED THAT ACCOUNT HOLDERS WILL BE INFORMED OF ALL MATERIAL CHANGES WITH RESPECT TO THE TRADING PROGRAM. THE FOREGOING DESCRIPTION IS GENERAL AND IS NOT INTENDED TO BE EXHAUSTIVE. CLIENTS MUST RECOGNIZE THAT THERE ARE INHERENT LIMITATIONS ON ALL DESCRIPTIONS OF INVESTMENT PROCESSES DUE TO THE COMPLEXITY, CONFIDENTIALITY, AND SUBJECTIVITY OF SUCH PROCESSES. IN ADDITION, THE DESCRIPTION OF VIRTUALLY EVERY TRADING STRATEGY MUST BE QUALIFIED BY THE FACT THAT TRADING APPROACHES ARE CONTINUALLY CHANGING.

FEES

The Client account managed by the Advisor is subject to two categories of fees: (1) those charged by the Advisor pursuant to the attached Managed Account Agreement and Power of Attorney (for more information, please see Appendix A to the Managed Account Agreement) and (2) those charged by other entities such as brokerage and regulatory agencies which will charge brokerage commissions, NFA, and exchange fees.

Fees Charged by Advisor

As compensation for its services, the Advisor charges a performance fee pursuant to a Managed Account Agreement and Power of Attorney which is delivered to the Client with this Disclosure Document.

Performance Fee

The Client shall pay the Advisor a performance fee (the "Performance Fee"), for each calendar quarter during which the Advisor is engaged in the management of the Managed Account, in an amount equal to twenty percent (20%) of any Trading Profits (as defined below) generated by the Advisor in the Managed Account during such calendar quarter (as measured at the close of business on the last day of such calendar quarter). Trading Profits shall be calculated on a "high watermark" basis so that any losses from prior periods must be recouped before new Trading Profit can again be generated. The Performance Fee will be appropriately prorated to reflect any withdrawals and contributions which occur during a quarter. With regard to the carry forward loss or "high watermark" referred to above, if the Client withdraws funds from the Account during a period when there is such a carry forward loss, the loss carry forward shall be reduced, at the time of the withdrawal, on an adjusted percentage basis. The Advisor may, in its discretion, reduce or waive the Performance Fee with respect to any Client.

"Trading Profits," for the purposes of the Managed Account Agreement, shall be defined as (i) the sum of: (A) the net of all realized profits and losses on futures positions liquidated during the calendar quarter after subtraction of brokerage commissions, (B) the net of all unrealized marked-to-market profits and losses on futures positions open as of the end of the calendar quarter, including brokerage commissions which would be incurred in liquidating the open positions, and (C) all net realized interest income, if any; (ii) less: (D) the net of all unrealized profits and losses on futures positions open at the end of the previous calendar quarter, plus the accrued commissions on open positions from the previous calendar quarter, (E) any expenses directly related to trading (i.e. give up charges) incurred during the respective calendar quarter, and (F) any cumulative net realized trading losses (which shall not include performance fee expenses) from Advisor's trading of the Managed Account carried forward from all previous calendar quarters since the last calendar quarter for which a performance fee was payable.

Please note: the Advisor does not intend to utilize an executing broker for give ups. If the Advisor enters into such transactions in the future it will amend this disclosure document accordingly.

Management Fee

The Advisor does not charge an asset management fee.

Payment of Advisor's Fees

Payment of Performance Fees will be made through the FCM carrying the Client's account via direct debit from the account. A Client is required to provide the FCM that carries such Client's account with written authorization to debit such Fees from the account in favor of the Advisor and, from time to time, to provide updated authorization upon the Advisor's request.

Other Fees/ Transaction Costs

The FCM for the Client's account will charge commissions, and may also charge brokerage fees, on the futures/commodity interest transactions. Commission charges will be reflected on confirmations/purchase and sales statements sent to the Client. Commission charges may vary but are expected to be between \$6 and \$20 round-turn per contract. In the event the Advisor requests the FCM to execute a transaction on the floor, Commission charges are expected to range between \$40 and \$90 per round-turn per contract. In addition, the account will be charged NFA fees and applicable exchange fees on trades executed for the Client's account.

If Client does not designate an FCM of their choice, the FCM shall be Stonex Financial, Inc. Brokerage commissions with Stonex Financial, Inc. are expected to range from \$1.98 to \$12.00 per round-turn contract.

The Client is directly responsible for the payment to his FCM of all margins, brokerage commissions and fees, and other transaction costs incurred in connection with transactions effected for the Client's account pursuant to instructions provided by the Advisor. Some FCMs charge upfront fees to open an account. This fee is not shared or participated in by the Advisor. If upfront fees are charged, then account will be based on the net amount (gross amount less upfront fees) deposited by Client for the calculation of any management and performance fees.

CONTRIBUTIONS AND WITHDRAWALS

An Account may be established with a minimum of \$100,000 subject to the discretion of the Advisor to reduce this minimum. The Client may generally make an additional contribution of at least \$10,000 to the Account at any time.

The Client may withdraw from the Account at any time but the Advisor requests at least seven (7) calendar days' prior written notice. Clients will be responsible for paying any associated clearing and regulatory fees associated with such withdrawal. In addition, the Advisor strongly recommends that its Clients view this managed Trading Program as a long-term investment and, accordingly, should not withdraw capital for at least thirty (30) days. The Client is advised that frequent withdrawals may adversely affect implementation of the Trading Program.

The Advisor reserves the right to terminate the Managed Account Agreement and Power of Attorney on thirty (30) days' prior written notice to the Client.

PARTIALLY FUNDED (NOTIONAL) ACCOUNTS

It should be noted that pursuant to an advisory published by the CFTC, all customer accounts with notional funding represented must be documented with an agreement between the Advisor and the client which specifies the "Nominal Account Size." In particular, "Nominal Account Size" is defined as the sum of notional funds and actual funds. Notional funds are not actually held in the account. Such funding is, instead, only a portion of the full amount which a client has agreed to allow the Advisor to trade as if the full amount of the funds were actually deposited in the account. Notional funding therefore allows a client to trade the account at a level higher than the cash actually held in the account.

Clients should be aware of the impact of partial funding upon account volatility. An account with notional funds is leveraged to a greater degree than a fully funded account. Additional leverage results in a proportionally greater risk of loss (and opportunity for gain). The table below illustrates the impact that different degrees of leverage can have on the Actual Rate of Return.

SPECIAL DISCLOSURE FOR NOTIONALLY-FUNDED ACCOUNTS

YOU SHOULD REQUEST YOUR COMMODITY TRADING ADVISOR TO ADVISE YOU OF THE AMOUNT OF CASH OR OTHER ASSETS (ACTUAL FUNDS) WHICH SHOULD BE DEPOSITED TO THE ADVISOR'S TRADING PROGRAM FOR YOUR ACCOUNT TO BE CONSIDERED "FULLY-FUNDED." THIS IS THE AMOUNT UPON WHICH THE COMMODITY TRADING ADVISOR WILL DETERMINE THE NUMBER OF CONTRACTS TRADED IN YOUR ACCOUNT AND SHOULD BE AN AMOUNT SUFFICIENT TO MAKE IT UNLIKELY THAT ANY FURTHER CASH DEPOSITS WOULD BE REQUIRED FROM YOU OVER THE COURSE OF YOUR PARTICIPATION IN THE COMMODITY TRADING ADVISOR'S PROGRAM.

YOU ARE REMINDED THAT THE ACCOUNT SIZE YOU HAVE AGREED TO IN WRITING (THE NOMINAL ACCOUNT SIZE) IS NOT THE MAXIMUM POSSIBLE LOSS THAT YOUR ACCOUNT MAY EXPERIENCE. YOU SHOULD CONSULT THE ACCOUNT STATEMENTS RECEIVED FROM YOUR FUTURES COMMISSION MERCHANT IN ORDER TO DETERMINE THE ACTUAL ACTIVITY IN YOUR ACCOUNT, INCLUDING PROFITS, LOSSES AND CURRENT CASH EQUITY BALANCE. TO THE EXTENT THAT THE EQUITY IN YOUR ACCOUNT IS AT ANY TIME LESS THAN THE NOMINAL ACCOUNT SIZE YOU SHOULD BE AWARE OF THE FOLLOWING:

1. ALTHOUGH YOUR GAINS AND LOSSES, FEES AND COMMISSIONS MEASURED IN DOLLARS WILL BE THE SAME, THEY WILL BE GREATER WHEN EXPRESSED AS A PERCENTAGE OF ACCOUNT EQUITY.

2. YOU MAY RECEIVE MORE FREQUENT AND LARGER MARGIN CALLS.

3. THE FUNDING MATRIX BELOW MAY BE USED TO CONVERT THE RATES-OF-RETURN (RORs) IN THE PERFORMANCE TABLES TO THE CORRESPONDING RORs FOR PARTICULAR FUNDING LEVELS.

ACTUAL ROR	ROR BASED ON VARIOUS FUNDING LEVELS			
30%	30%	37.5%	50%	60%
20%	20%	25%	33.33%	40%
10%	10%	12.5%	16.67%	20%
0%	0%	0%	0%	0%
-10%	-10%	-12.5%	-16.67%	-20%

-20%	-20%	-25%	-33.33%	-40%
-30%	-30%	-37.5%	-50%	-60%
	100%	**80%**	**60%**	**50%**
	LEVEL OF FUNDING			

Additional Leverage - Partially-funded (notional) accounts will experience even greater volatility and risk against their equity contribution (actual funds) than fully-funded accounts due to the increased leverage (margin levels) of using notional funding as explained above.

Fee Computations - All fee computations are based on the Nominal Account Size which increases the fees and commissions as a percentage of actual funds but will not increase the dollar amount of those fees. The Advisor does not charge any management fees and only charges a Performance Fee. The fees charged on partially-funded (notional) accounts are reflected in the following formula, where "n" is the percentage fee based on the nominal account size and "a" is the percentage based on actual funds:

(Nominal Account Size/actual funds) * n = a

For example: At the end of each quarter, if an incentive fee has been earned by the Advisor (typically 20% of trading profits), the trading account would be reduced by this incentive fee. To demonstrate, if the account started with a Nominal Account Size of $150,000 ($100,000 actual funds and $50,000 notional funds) and the Advisor earned in trading profits $50,000 for the account for the quarter bringing the total Nominal Account Size to $200,000. The Advisor would be paid $10,000 as an incentive fee (20% of the $50,000 profit). This would reduce the Nominal Account Size to $190,000. This would leave the account with $140,000 actual funds and $50,000 notional funds.

Please note that when an account uses any amount of notional funds, the rate of return that is experienced by Client will be different than if Client had "fully funded" the account.

Affects of Cash Additions/Withdrawals and Net Performance - All cash additions/withdrawals including the net performance of the account will be added or subtracted to the actual funds in the account and will not affect the Nominal Account Size. Specifically, any additions or profits will be added to the actual funds size resulting in a simultaneous decrease in the notional funds leaving the Nominal Account Size unchanged, until profits exceed the original nominal amount at which time the account will no longer be considered a notional account. Similarly, any withdrawals or losses will be subtracted from the actual funds resulting in a simultaneous increase in the notional funds leaving the Nominal Account Size unchanged. The Nominal Account Size can change if the Advisor and the client mutually agree to that change.

For example: If client funds the account with $50,000 actual funds and $50,000 notional funds for a $100,000 Nominal Account Size, an additional $25,000 deposit would mean the account then would have $75,000 actual funds and $25,000 notional funds. Client should be aware that any subtractions due to net performance and/or withdrawals will increase the effect of notional funding with the increase of leverage based on the lesser amount of actual funds committed.

PAST PERFORMANCE

The CFTC requires each commodity trading advisor to disclose the past performance history of all client accounts directed by it and certain of its principals for the previous five years and the year-to-date.

Clients will be permitted to review the managed account trading records of the Advisor and its trading principals, including policies related to such trading accounts, if applicable.

The pool currently has two share classes: Class A and Class B. Y & Q Investments LLC is the CPO for both classes. Both Classes use similar trading strategy. However, Class A is traded in multiple markets such as SP500 and Crude Oil and etc. with a an aggressive approach to pursue faster growth, while Class B is traded in various markets such as Crude Oil market and SP500 index and etc with a conservative approach to pursue stable growth. The managed account and pools use similar trading strategy. The managed account is traded in SP500 index, Nasdaq 100 index and various other markets.

The clients may find that the monthly trading results of managed account are different from Class A of the pool. This is because Nasdaq 100 index composed of technology stocks is normally more volatile than SP500 index. The trading results of Class B are also different from Class A due to trading less contracts.

Note: There were four proprietary accounts for the Principals and their relatives which are traded the same way as other accounts in the managed account program before Oct. 2014. Currently, there are no proprietary accounts.

Managed account trading results of the Advisor and its Principals are presented below.

YQ Managed Account

Name of CTA:	Y & Q Investments, LLC
Name of Trading Program:	Blue Whale Trading Program
Inception of Trading by CTA:	April 2011
Inception of Trading in Offered Program:	April 2011
# of Accounts in Currently Traded Pursuant to the Program:	128
Total Nominal Assets under Management:	$140,033,575.05
Total Nominal Assets Traded Pursuant to the Program:	$85,164,604.75
Largest Monthly Drawdown:	-6.47% (Feb. 2020)
Worst Peak-to-Valley Drawdown:	-6.47% (Feb. 1, 2020to Feb., 28 2020)
Number of Profitable Accounts that have Opened and Closed:	111
Range of Returns Experienced by Profitable:	0.69% - 255.76%
Number of Losing Accounts that have Opened and Closed:	10
Range of Returns Experienced by Unprofitable Accounts:	-1.25% - -16.60%

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

"Drawdown" is defined as losses experienced by a pool or trading program over a specified period.

"Worst Peak-to-Valley drawdown" is defined as the greatest cumulative percentage decline in month end net asset value due to losses sustained by a pool or trading program during any period in which the initial month-end net asset value is not equaled or exceeded by a subsequent month-end net asset value.

"Year-to-Date" represents the compounded rate of return for each year or portion of the year presented. It is computed by applying successively the respective Monthly Rate of Return beginning with the first month of that year. The calculation assumes a continuous investment throughout the period.

POOL TRADING RESULTS

Limited Partners will be permitted to review the pool's trading records of the CPO and its trading principals, including policies related to such trading accounts, if applicable.

Pool's trading results are presented below.

"Drawdown" is defined as losses experienced by a pool or trading program over a specified period.

"Worst Peak-to-Valley drawdown" is defined as the greatest cumulative percentage decline in month end net asset value due to losses sustained by a pool or trading program during any period in which the initial month-end net asset value is not equaled or exceeded by a subsequent month-end net asset value.

"Year-to-Date" represents the compounded rate of return for each year or portion of the year presented. It is computed by applying successively the respective Monthly Rate of Return beginning with the first month of that year. The calculation assumes a continuous investment throughout the period.

PROPRIETARY TRADING RESULTS

Clients will be permitted to review the proprietary trading records of the Advisor and its trading principals, including policies related to such trading accounts, if applicable.

Proprietary trading results mean the performance of any pool or account in which 50% or more of the beneficial interest is owned or controlled by (1) the Advisor, or any principal thereof; (2) an affiliate or family member of the Advisor; or (3) any person providing services to the account.

No proprietary trading results for the Principals are presented here.

CONFLICTS OF INTEREST

Advisor's Proprietary Trading – The Advisor and/or its principals and/or employees, if any, (together "Related Persons") may trade any instruments, including commodity futures contracts and options, for their personal and/or business account, and/or may trade for the purpose of contests or in testing new investment strategies, as long as such trading does not amount to a breach of fiduciary duty. Trading decisions for the Advisor and/or its Related Persons' account(s) could conceivably result in positions that could compete with, occur ahead of or are opposite to, those in Client accounts. However, a Client's account will NOT be purposely executed at less than favorable prices than would be filled for the Advisor and/or its Related Persons' account(s), nor will the Advisor and/or its principals intentionally take a position opposite of a Client's account. With batched trades, the Advisor and/or its Related Persons' account(s) will take the worst fills. The Advisor believes that the size of its account and the accounts of its Related Persons is or would be small and insignificant in relation to the overall market.

Other Clients – The Advisor will manage other investor accounts. These other accounts could result in positions that compete with, occur ahead of or are opposite to, those in Client's account. The Advisor may charge different fees, which could create an incentive to favor those accounts over any one Client's account. However, there can be no assurance that the performance of those other accounts will be similar to those of a Client's account. Client accounts are maintained on a confidential basis—please see the Advisor's Privacy Policy attached to this Disclosure Document.

Employment and Other Business Interests – The Advisor's related persons may engage in full time or part time employment while continuing to trade the Client's account. The time devoted to any such employment, as well as other business and personal interests, will compete with the time devoted to managing Client's account.

Futures Commission Merchants and Introducing Brokers - FCMs have numerous accounts and will be executing trades for a variety of different accounts in the same markets at the same time. Executing orders for different, and possibly competing, accounts at the same time involves an inherent conflict of interest. Certain accounts at the FCM may be allotted lower brokerage rates than the accounts of the Advisor's Clients. Similarly, introducing brokers have numerous accounts and will be soliciting orders for a variety of different clients in the same markets at the same time. Soliciting or directing trades for different, and possibly competing, customers at the same time involves an inherent conflict of interest. In the event that a client selects an introducing broker and the Advisor approves such broker, a conflict of interest may arise with the use of such broker.

Currently, the Advisor is not aware of any potential or actual conflicts of interest as a result of the Advisor recommending Stonex Financial, Inc.

Commission Rebate - In the event that a client should choose an FCM where the Advisor has a commission rebate agreement (or if such agreement is later entered into), the Advisor would have a conflict of interest resulting from an incentive to trade the Client's account more frequently and thus generate increased brokerage commissions for the FCM.

Currently, the Advisor does not have commission rebate agreements. If the Advisor enters into such agreements in the future, it will amend this Disclosure Document accordingly.

Fees – The fact that the Advisor earns a Performance Fee only if it generates a profit in the Client's account creates a potential conflict of interest by providing a possible incentive for the Advisor to make riskier or more speculative investments than it might make otherwise. In some cases, the Performance Fees charged by the Advisor may be greater than the fees that other investment advisers charge for similar services. Additionally, the benefits provided by the Advisor to the Client may be less than the services provided by other trading advisors.

LITIGATION

There are no administrative, civil, or criminal actions pending, on appeal, or concluded against the Advisor and/or Principals, in any capacity, within five years preceding the date of this Disclosure Document.

Futures Commission Merchant

Stonex Financial, Inc. has represented to the Advisor. here are several administrative, civil, or criminal actions taken against Stonex Financial, Inc within five years preceding the date of this Disclosure Document. Please refer to page 8 for details.

TRADING FOR ADVISOR'S OWN ACCOUNT

The Advisor and its Associated Persons/Principals intend to trade for their own account. Clients will be permitted to inspect the records of the Advisor and its Associated Persons/Principals' proprietary trades during business hours on the Advisor's premises. Clients will not be permitted to make copies of any of the Advisor and its Associated Persons'/Principals' proprietary trading records.

ORDER ENTRY AND ALLOCATION

The Advisor intends to place batched orders for all or many accounts in which the same commodity interest is being traded through the FCM. In those instances, the Advisor will work with the FCM determine the objective non-preferential price allocation procedures.

TAX CONSIDERATIONS

CIRCULAR 230 NOTICE. THE FOLLOWING NOTICE IS BASED ON THE U.S. TREASURY REGULATIONS GOVERNING PRACTICE BEFORE THE U.S. INTERNAL REVENUE SERVICE: (1) ANY U.S. FEDERAL TAX DISCUSSION CONTAINED HEREIN, IS NOT INTENDED OR WRITTEN TO BE USED, AND CANNOT BE USED, BY ANY TAXPAYER FOR THE PURPOSE OF AVOIDING U.S. FEDERAL TAX PENALTIES THAT MAY BE IMPOSED ON THE TAXPAYER; (2) ANY SUCH DISCUSSION IS WRITTEN TO SUPPORT THE PROMOTION OR MARKETING OF THE TRANSACTIONS DESCRIBED HEREIN; AND (3) EACH TAXPAYER SHOULD SEEK ADVICE BASED ON THE TAXPAYER'S PARTICULAR CIRCUMSTANCES FROM AN INDEPENDENT TAX ADVISER.

Due to complexity of taxation law, the Advisor does not provide tax advice. Each Client should consult and depend on their own tax advisors and/or counsel regarding the federal, state, local and foreign tax consequences of participating in the Advisor's Trading Program.

PRIVACY POLICY

Information Advisor Collects from the Client – The Advisor collects and retains nonpublic personal information about Clients that may include:

- Information received on Client's account applications or other forms such as your name, address, financial information, social security number and/or federal tax ID number; and
- Information received about Client's trading activity in the accounts that the Advisor manages on Client's behalf, such as purchases, sales, exchanges and account balances

Information the Advisor May Share – The Advisor does not sell any of Client's nonpublic personal information to third parties. The Advisor may share all the information the Advisor collects with third parties only when those third parties are acting on the Advisor's behalf in servicing Client's accounts, or as required by law. These third parties may include:

- Service providers who, for example, process transactions for a Client's account, print checks or prepare account statements;
- Governmental bodies, other regulatory agencies or self-regulatory organizations, or as otherwise required by law.

When information is shared with third parties, they are legally obligated to maintain the confidentiality of the information and to limit their use of it to servicing Client's account, except as permitted or required by law.

Information Security Policies

The Advisor maintains physical, electronic, and procedural safeguards to protect Client's nonpublic personal information. If a Client relationship ends, the Advisor will continue to treat the information as described in this privacy policy.

APPENDIX A:

Y & Q Investments, LLC

MANAGED ACCOUNT AGREEMENT AND POWER OF ATTORNEY

Y & Q Investments, LLC

MANAGED ACCOUNT AGREEMENT
AND POWER OF ATTORNEY

This Agreement is entered into on ________________ (date) by and between Y & Q Investments, LLC ("Y & Q") and ______________________________ (the "Client").

WHEREAS, Y & Q is registered with the Commodity Futures Trading Commission ("CFTC") as a commodity trading advisor ("CTA") and is a Member of the National Futures Association ("NFA"); and

WHEREAS, the Client wishes to invest in the trading of futures contracts and options on futures contracts (together "futures contracts") and wishes to retain Y & Q to manage a portion of its assets through the trading of futures contracts; and

WHEREAS, Y & Q has heretofore delivered to the Client a Disclosure Document, dated March 31, 2025 (the "Disclosure Document"), relating to Y & Q's managed account program, also known as the trading program (the "Program"); and

WHEREAS, Client has determined to participate in the Program and, in connection therewith, to open a futures trading account (the "Managed Account") to be traded as set forth in Section 1 hereof in order to have such account managed by Y & Q on a fully discretionary basis as described in the Disclosure Document; and

WHEREAS, Client and Y & Q wish to enter into this Agreement, which sets forth the terms and conditions upon which Y & Q will perform services relating to the management of the Managed Account, it being understood and agreed that the terms on which clearing brokerage services are performed for the Managed Account shall be established by the customer agreement between Client and the clearing broker or brokers designated by Client.

NOW, THEREFORE, in consideration of the promises and the mutual covenants contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. Establishment of Account and Deposit or Withdrawal of Funds. Client shall open an account with a futures commission merchant (FCM) of their own choice (which shall constitute the Managed Account) to be managed by Y & Q, for the sole purpose of trading of futures contracts. If Client does not designate an FCM of their choice, the FCM shall be StoneX Financial, Inc.

Within ten (10) calendar days of opening the Managed Account, the Client will initially deposit U.S. $__________________________ (investment amount) in the Managed Account (the "Initial Funds"). The Managed Account may be established with a minimum of $100,000 subject to the discretion of the Advisor to reduce this minimum. The Client may generally make an additional contribution of at least $10,000 to the Managed Account at any time. The Client may withdraw from the Managed Account at any time but Y & Q requests at least seven (7) calendar days' prior written notice. Clients will be responsible for paying any associated clearing and regulatory fees associated with such withdrawal. In addition, Y & Q strongly recommends that its Clients view this managed Trading Program as a long-term investment and, accordingly, should not withdraw capital for at least thirty (30) days. The Client is advised that frequent withdrawals may adversely affect implementation of the Trading Program. Y & Q reserves the right to terminate this Agreement on thirty (30) days' prior written notice to the Client.

2. Power of Attorney. From the date hereof until such time as Client sends a written notice to Y & Q, Client hereby constitutes and appoints Y & Q as Client's agent and true and lawful attorney-in-fact, in its name, place and stead, to (i) buy and sell futures contracts, on margin or otherwise, for the account and risk of Client through the Managed Account and (ii) execute for and on behalf of Client standard customer agreements with such clearing brokerage firms as Client may designate. As attorney-in-fact, Y & Q shall be, in all matters necessary or incidental to the conduct of the Managed Account, including the receipt or making of transfers and/or delivery of funds, authorized to act for Client in the same manner and with the same force and effect as Client might or could do. The foregoing power of attorney and trading authority shall be deemed to be continuing and shall remain in full force and effect until such time as this Agreement shall have been terminated pursuant to Section 8 hereof. Such power of attorney may not be modified or limited orally or by any course of dealing between Y & Q and Client; any such modification or limitation being required to be in writing to be of any force or effect. For avoidance of doubt, this Agreement shall not grant to Y & Q and Y & Q shall not have any authority to withdraw funds from or otherwise transfer any assets out of the Managed Account.

3. Y & Q Compensation. As compensation for the services to be provided hereunder, the Client shall pay Y & Q the compensation set forth in **Schedule A** appended hereto.

4. Standard of Liability; Risk of Loss. Y & Q, its principals, officers, employees, agents and affiliates shall not be liable, responsible or accountable in damages or otherwise to Client, its successors or assigns, except for gross negligence or reckless or intentional misconduct. Y & Q makes no guarantee that any of its services will result in a profit or will not result in a loss for Client. All transactions effected for Client's account are at Client's risk, and Client shall be solely liable therefor under all circumstances. Client is willing and financially able to sustain such losses. Y & Q shall not be liable to Client for the loss of any margin deposits which is the direct or indirect result of the bankruptcy, insolvency, liquidation, receivership, custodianship or assignment for the benefit of creditors of any bank, clearing or other broker, exchange, clearing organization or similar entity. Client shall indemnify Y & Q and its principals, officers, employees and affiliates against any loss, cost or damage arising out of any obligation of Client under its customer agreements with clearing brokers.

5. Regulatory Jurisdiction. All transactions by Y & Q on Client's behalf shall be subject to the applicable constitution, rules, regulations, customs, usages, rulings and interpretations of any exchange or market and its clearing house, if any, on which transactions are executed for the Managed Account, and to all applicable governmental acts and statutes (such as the Commodity Exchange Act, as amended) and the rules and regulations thereunder (collectively, "Rules and Regulations"). Y & Q, its partners, officers, employees, agents and affiliates shall not be liable to Client as a result of any action taken to comply with any Rules or Regulations. The provisions of this Section 5 are solely for the protection and benefit of Y & Q and any failure by Y & Q to comply with any of the Rules and Regulations shall not relieve Client of any obligations under this Agreement nor be construed to create rights hereunder in favor of Client against Y & Q.

6. Representations and Warranties of Client. Client represents warrants and acknowledges that Client has received and carefully reviewed the Disclosure Document, and in particular, that section of the Disclosure Document relating to "Risk Factors," and fully understands the risks associated with investing in the Managed Account. Client further acknowledges that Client has been given the opportunity to inquire of Y & Q as to any and all matters relating to the investment of funds in the Managed Account concerning which Client has had questions, and that Client has made such inquiries as Client deemed relevant or necessary prior to opening the Managed Account. Y & Q represents and warrants that it will manage Client's account in accordance with the Disclosure Document dated March 31, 2025 and within the limits of the power of attorney granted herein.

7. Management of Various Accounts. Client understands that the officers, principals, and employees of Y & Q maintain personal accounts for trading futures contracts, as well as other commodities and securities, and may have substantial investments in certain futures contracts and other accounts managed by Y & Q and its affiliates, and Y & Q and/or its principals and affiliates may in the future manage or invest in other futures accounts or other commodities and securities accounts. Y & Q may vary the contracts and other instruments traded or proportions of each contract and other instrument in relation to others, or particular timing signals utilized for the various accounts under management, in light of the objectives of and constraints on each account and other relevant factors. It is understood that such variation may result in substantial differences in results between the Managed Account and other accounts managed by Y & Q and/or its principals and affiliates. Y & Q might have a financial incentive to favor other accounts over the Managed Account. However, Y & Q hereby represents and warrants that under no circumstances will it knowingly use systems for the Managed Account which are inferior to systems used for any other account managed by it, nor will it knowingly or deliberately favor any partnership or account managed by it over the Managed Account in any way or manner whatever.

8. Term and Termination. This Agreement may be terminated by either party on thirty (30) days' notice by the delivery of written notice to the other of such termination. Upon any termination, Client shall pay Y & Q all outstanding fees owed pursuant to Section 3 herein and **Schedule A** attached hereto, such fees to be computed, if applicable, pro rata to the close of business on the date such termination becomes effective.

9. Confidentiality. Each of the parties to this Agreement agrees to maintain in strict confidence the terms of this Agreement and any and all information, materials or other documents regarding the other which it obtains pursuant to or in connection with this Agreement, and agrees that it shall not disclose any such documents, material or other information unless required to do so by law, regulation, the request of any regulatory or self-regulatory authority or valid legal process. Client agrees to respect and protect the confidentiality of Y & Q's systems and methods to the fullest extent practicable and hereby authorizes Y & Q to instruct each broker which may act for the Managed Account to protect such confidentiality. Client shall (1) limit access to and knowledge of Y & Q's positions, trades and trading methods to those with a reasonable need to know and (2) prevent others under its control from knowingly duplicating in other accounts the positions and trades of the Managed Account.

10. Notices. All notices required to be delivered under this Agreement shall be in writing, shall be effective upon receipt and shall be delivered personally or sent by telecopier, facsimile, telex, courier or overnight delivery service (such as Federal Express), or registered or certified mail, postage prepaid and return receipt requested, as follows:

If to the Client, to:

________________________________ (Client Name)
________________________________ (Client Address)
____
Attn: __________________________
Phone Number: ___________________
Email: ___________________

If to Y & Q, to:

42764 Jonquil Ln
Chantilly, VA 20152
Attn: Dan Yu
Phone Number: 703-863-7945
Fax Number: 703-689-3608

11. No Assignment. No party hereto may assign any of its rights hereunder without the prior written consent of the other party. This Agreement shall not be construed to confer any benefit on any person other than the parties hereto and their respective successors and assigns.

12. Governing Law; Arbitration. This Agreement and all transactions subject to this Agreement shall be governed by the Commodity Exchange Act, as amended; the rules, regulations, and orders promulgated under such Act by the Commodity Futures Trading Commission; the Rules and Regulations of the National Futures Association and, where applicable, the laws of the State of Virginia without regard to conflict of law principles.

Any controversy between the Y & Q and Client arising out of or related to Client's account, or to this agreement or the breach thereof, shall be settled only by arbitration in accordance with the rules of the National Futures Association, the contract market on which the transaction giving rise to the dispute was executed or could have been executed, or the American Arbitration Association, as Client may elect.

Notification of Client's intent to arbitrate must be sent by Certified Mail to Y & Q Investments, LLC at 42764 Jonquil Ln, Chantilly, VA 20152. At such time as Client may notify Y & Q of Client's intend to submit a claim to arbitration, or at such time as Y & Q notifies Client of intent to submit a claim to arbitration, Client will have the opportunity to elect a qualified forum for conducting the proceedings from a list Y & Q will provide to Client within 10 days of receipt of such notice. If Client does not make such an election within 45 days of demand by Y & Q that Client make such an election, then Y & Q may make such an election. Y & Q acknowledges that it may be required to pay any incremental fees that may be assessed by the forum chosen by Client for provision of a mixed panel, unless the arbitrators in a particular proceeding determine that Client has acted in bad faith in initiating or conduction that proceeding. Any proceeding must be commenced within one year after the transaction or occurrence complained of and the hearing is to be held in Herndon, Virginia. In such proceeding both Client and Y & Q waive any right to punitive damages. Judgment upon the arbitration award shall be final and may be entered in any court having jurisdiction thereof.

THREE FORUMS EXIST FOR THE RESOLUTION OF COMMODITY DISPUTES: CIVIL COURT LITIGATION, REPARATIONS AT THE COMMODITY FUTURES TRADING COMMISSION (CFTC) AND ARBITRATION CONDUCTED BY A SELF-REGULATORY OR OTHER PRIVATE ORGANIZATION.

THE CFTC RECOGNIZES THAT THE OPPORTUNITY TO SETTLE DISPUTES BY ARBITRATION MAY IN SOME CASES PROVIDE MANY BENEFITS TO CUSTOMERS INCLUDING THE ABILITY TO OBTAIN ANY EXPEDITIOUS AND FINAL RESOLUTION OF DISPUTES WITHOUT INCURRING SUBSTANTIAL COSTS. THE CFTC REQUIRES, HOWEVER, THAT EACH CUSTOMER INDIVIDUALLY EXAMINE THE RELATIVE MERITS OF ARBITRATION AND THAT YOUR CONSENT TO THIS ARBITRATION AGREEMENT BE VOLUNTARY.

BY SIGNING THIS AGREEMENT, YOU: (1) MAY BE WAIVING YOUR RIGHT TO SUE IN A COURT OF LAW; AND (2) ARE AGREEING TO BE BOUND BY ARBITRATION OF ANY CLAIMS OR COUNTERCLAIMS WHICH YOU OR Y & Q MAY SUBMIT TO ARBITRATION UNDER THIS AGREEMENT. YOU ARE NOT, HOWEVER, WAIVING YOUR RIGHT TO ELECT INSTEAD TO PETITION THE CFTC TO INSTITUTE REPARATIONS PROCEEDINGS UNDER SECTION 14 OF THE COMMODITY EXCHANGE ACT WITH RESPECT TO ANY DISPUTE WHICH MAY BE ARBITRATED PURSUANT TO THIS AGREEMENT. IN THE EVENT A DISPUTE ARISES, YOU WILL BE NOTIFIED IF THE ADVISOR INTENDS TO SUBMIT THE DISPUTE TO ARBITRATION. IF YOU BELIEVE A VIOLATION OF THE COMMODITY EXCHANGE ACT IS INVOLVED AND IF YOU PREFER TO REQUEST A SECTION 14 "REPARATIONS" PROCEEDING BEFORE THE CFTC, YOU WILL HAVE 45 DAYS FROM THE DATE OF SUCH NOTICE IN WHICH TO MAKE THAT ELECTION.

YOU NEED NOT SIGN THIS ARBITRATION PROVISION TO OPEN AN ACCOUNT WITH Y & Q: SEE CFTC REGULATION 166.5.

13. Force Majeure Events. Y & Q shall take reasonable actions to permit the continued performance of its obligations hereunder in the event of the occurrence of a force majeure event. Notwithstanding the foregoing, Y & Q shall not be liable for its failure to perform any of its obligations hereunder during any period in which such performance is delayed by a force majeure event, which shall be defined as an earthquake, fire, flood, or other act of God, or war, terrorist act, or criminal act (including without limitation viruses, worms, malware or computer hacking that circumvent reasonable computer security measures).

14. Entire Agreement; Counterparts. This Agreement sets forth the entire agreement of the parties relating to the subject matter hereof except as otherwise set forth herein. This Agreement may be executed in one or more counterparts each of which shall, however, together constitute one and the same document.

15. Severability; Waiver. If any provision of this Agreement is held to be invalid or unenforceable, the remaining provisions of this Agreement shall continue in full force and effect. No failure or delay on the party or any party hereto in exercising any right, power or remedy hereunder shall operate as a waiver thereof, nor shall any single or partial exercise or any such right, power or remedy preclude any other or further exercise thereof or the exercise of any other right, power or remedy. Any waiver granted hereunder must be in writing and shall be valid only in the specific instance in which given.

SCHEDULE A

As compensation for the management services to be provided hereunder, the Client shall pay Y & Q the following compensation:

(a) A performance fee (the "Performance Fee"), for each calendar quarter during which Y & Q is engaged in the management of the Managed Account, in an amount equal to twenty percent (20%) of any Trading Profits (as defined herein) generated by Y & Q in the Managed Account during such calendar quarter (as measured at the close of business on the last day of such calendar quarter). Trading Profits shall be calculated on a "high watermark" basis so that any losses from prior periods must be recouped before new Trading Profit can again be generated. The Performance Fee will be appropriately prorated to reflect any withdrawals and contributions which occur during a quarter. With regard to the carry forward loss or "high watermark" referred to above, if the Client withdraws funds from the Account during a period when there is such a carry forward loss, the loss carry forward shall be reduced, at the time of the withdrawal, on an adjusted percentage basis. The Advisor may, in its discretion, reduce or waive the Performance Fee with respect to any Client.

(b) Any fees due to Y & Q hereunder shall be invoiced to Client when due and shall be paid through the FCM carrying the Client's account via direct debit from the account.

(c) "Trading Profits," for the purposes of this Agreement, shall be defined as (i) the sum of: (A) the net of all realized profits and losses on futures positions liquidated during the calendar quarter after subtraction of brokerage commissions, and (B) the net of all unrealized marked-to-market profits and losses on futures positions open as of the end of the calendar quarter, including brokerage commissions which would be incurred in liquidating the open positions, and (C) all net realized interest income, if any; (ii) less: (D) the net of all unrealized profits and losses on futures positions open at the end of the previous calendar quarter, plus the accrued commissions on open positions from the previous calendar quarter, (E) any expenses directly related to trading (i.e. give up charges, if such charge is ever applicable in the future) incurred during the respective calendar quarter, and (F) any cumulative net realized trading losses (which shall not include performance fee expenses) from Y & Q trading of the Managed Account carried forward from all previous calendar quarter since the last calendar quarter for which a Performance Fee was payable.

(d) All open positions shall be valued at their then market value, which means the settlement price as determined by the exchange on which the transaction is effected, or the most recent appropriate quotation as supplied by the clearing broker or banks through which the transaction is effected. If there are no trades on the date of the calculation due to operation of the daily price fluctuation limits or due to a closing of the exchange on which the transaction is executed, the contract will be valued at fair value as of the close of the then most recent trading day. Interest, if any, shall accrue monthly.
